# Certificate

We hereby certify that the lithium-ion accumulators and batteries used in our product

## **e-motion M15**

satisfy the requirements of the following regulations or special provisions

**IATA Part 1 of PI 965, PI 966, PI 968, PI 969, PI 970**  
**ADR Special Provision 188**  
**IMDG Special Provision 188**

and are therefore NOT RESTRICTED.

The observance of all safety instructions mentioned in the user manual is prerequisite to satisfying all of the above requirements. Please note in particular that the lithium-ion accumulators *must not* be transported installed in the wheel.

The battery of the remote control, on the other hand, may only be transported on passenger flights when inserted into the remote control.

This certificate does not apply to damaged batteries.

We generally recommend inquiring about the transport provisions of a respective airline with regard to lithium-ion accumulators and batteries before embarking on a flight with that airline.

Due to the frequent amendments of the respective regulations, which partly occur on an annual basis, this Certificate is valid until **31 December 2010**.

Albstadt, 21th of December 2009
