TÜV tested  
For your safety

„Finally we can go anywhere  
with the wheelchair!“

# No more obstacles for us – thanks to the scalamobil and scalacombi

## Climb stairs safely and easily – proven thousands of times

Every single step becomes an obstacle when an illness or handicap stops you climbing the stairs on your own: at home, at the surgery, in public buildings or when visiting friends and family. The mobile stair climbers from Alber – scalamobil and scalacombi – pave your way.

## And this is how it works

Two electrically driven pairs of wheels continually climb one step after the other – upwards and downwards. This is ensured by a gentle yet reliable climbing mechanism – patented by Alber. When descending the stairs, four safety brakes stop scalamobil and scalacombi automatically at the edge of each step. The operator selects the direction and speed. When climbing the stairs, he or she only has to keep the stair climber in balance. The electric motor does the work at the touch of a button.

## The product benefits at a glance

- Cope with narrow and spiral staircases – at home and elsewhere
- Functions on any floor covering – whether wood, stone, metal or carpet
- No damage to stairs or floor covering
- ErgoBalance handles for safe operation with minimum exertion
- Climbs up to 300 steps with a single battery charge
- Integrated sensors for your safety

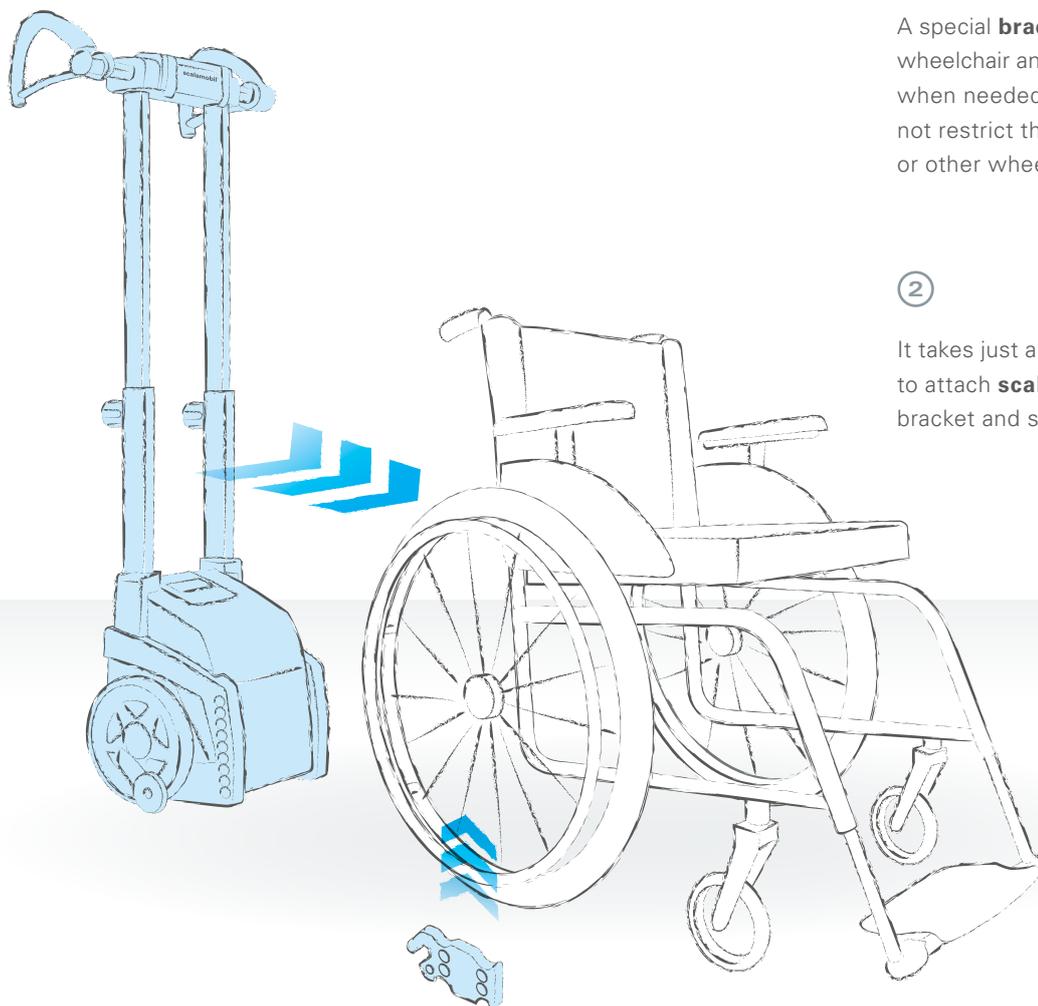

# scalamobil®

①

A special **bracket** is fitted to your wheelchair and scalamobil is attached when needed. This device does not restrict the folding mechanism or other wheelchair settings.

②

It takes just a few twists of the wrist to attach **scalamobil** to the wheelchair bracket and secure it.

## Climb the steps in your own wheelchair

scalamobil fits most common wheelchair models. The great advantage: you can stay seated in your wheelchair to climb the stairs.

**Universal adapter scalaport** for the transport of various types of wheelchairs without any special brackets. Particularly suitable for transport services and public buildings.

“Climbing stairs at the touch of a button without any effort.”

# scalacombi®

## Climbing stairs with an integrated seat unit

Perhaps you need assistance to climb the stairs, but don't really need a wheelchair. The stair climber scalacombi will get you upstairs and downstairs with no effort at all. The compact dimensions and steerable front wheels make the scalacombi extremely versatile. It can be easily manoeuvred even in very small rooms and on narrow stairways.

When not in use, the scalacombi can be folded up to save space.

scalamobil and scalacombi also come as special versions for particularly high steps (up to 25 cm/ 9.8 inches). There is also a comprehensive range of accessories for all versions (e.g. belt systems, headrest).

“Safely and comfortably  
on every staircase –  
this is quality of  
life again.”

# scalamobil and scalacombi – their particular strengths

## Intelligent and safe

The highest degree of safety and comfort when climbing stairs thanks to intelligent electronics: scalamobil and scalacombi can be programmed to adapt to the character of your stairs at home and will then climb them particularly gently and comfortably.

## Easy to operate

Due to excellent ergonomics and all operating elements in the exact place, it is easy to keep the stair climber in the optimal position. This is where Alber's more than 25 years of experience in the development of mobile stair climbers can really be felt and experienced.

## Versatile

scalamobil and scalacombi adapt to your needs – not the other way around. The handles can be adjusted in height and width and thus adapts perfectly to the person operating it and to the stairs.

**ErgoBalance handles:** non-slip with a convenient shape

**Display showing** all functions at a glance

**Comfortable cushioning:** for resting the operating unit on the thigh

# Convenient technology on the go

scalamobil and scalacombi can be used everywhere. Your stair climber can be dismantled in a flash into three compact parts and will even fit in small car boots.

The battery pack can be removed with one hand, is 3 kg (6.6 lb) light and has enough energy for up to 300 steps with just one battery charge.

“less than” 3 kg hab ich rausgenommen

## scalamobil and scalacombi at a glance
